Profile Summary

Adobe Certified Experience Manager (AEM) Sites Developer Expert and Full S Developer with **5+ years** of experience delivering reusable, responsive, and accessible digital experiences for global enterprise clients across commerce, pharma, and FMCG.
Strong in AEM component development, AEM Edge Delivery Services (EDS), JavaScript (ES6+), React.js, component-based architecture, state management, REST API integration, frontend performance optimization, WCAG 2.1 accessibility, production troubleshooting, and Jenkins CI/CD release support, delivering scalable and responsive enterprise web applications.

Certifications

- Adobe Certified Expert – Adobe Experience Manager Sites Developer Expert | Adobe
- Claude Associate Foundations Certification

Skills

AEM & CMS: Adobe Experience Manager (AEM) Sites, AEM as a Cloud Service (AEMaaCS), AEM Edge Delivery Services (EDS), HTL (Sightly), Sling Models, Touch UI Dialogs, Editable Templates, Client Libraries (Clientlibs), CRXDE Lite, Dispatcher, OSGi, Content Fragments, Experience Fragments, Web Components

Frontend: Frontend: JavaScript (ES6+), TypeScript, React.js, JSX, React Hooks,Custom Hooks, React Router, Context API, Redux, Redux Toolkit, HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, jQuery, Responsive Design, Reusable Components, Cross-Browser Compatibility, Browser Debugging.

Backend & APIs: Node.js, REST APIs, Shopify API, Microservices Consumption, API-Driven Frontend Architecture, Headless CMS Patterns

Performance & Accessibility: Asset Optimization, Lazy Loading, Page Validation, WCAG 2.1, Keyboard Navigation, ARIA, Focus Management

DevOps & Tools: Git, Jenkins CI/CD, Release Validation, Production Support, Splunk, Quantum Metrics, AI-Assisted Development (Claude Code)

Additional Knowledge: Java fundamentals for AEM, CDN and caching concepts, MuleSoft/API-led integration concepts, Adobe Analytics and Adobe Target fundamentals

Ways of Working: Agile/Scrum, Sprint Planning, Team Collaboration, Cross-Functional Stakeholder Communication, Technical Issue Reporting, Knowledge Sharing

Professional Experience

AEM FrontEnd Developer | Cognizant Technology Solutions | Jun 2024 – Present

Client: British American Tobacco (BAT) | Enterprise Commerce Platform

- Developed **15+ reusable AEM frontend components** with JavaScript (ES6+), TypeScript, SCSS, and NodeJS to improve UI consistency and content authoring flexibility.
- Configured **AEM Touch UI Dialogs** and collaborated with backend teams on component rendering using **Sling Models**.
- Built REST API-consuming UI components and integrated **Shopify API** data for dynamic content rendering and commerce functionality.
- Delivered checkout address book, free shipping tracker, and clear cart modal features across enterprise customer journeys.
- Resolved accessibility issues in modal workflows through keyboard navigation improvements and focus management, supporting WCAG-aligned experiences.
- Managed **2+ production incidents per month** using Splunk, collaborating with QA and product teams on P1/P2 issues.
- Executed **Jenkins CI/CD** deployments and release activities while contributing to Agile/Scrum ceremonies with cross-functional teams.
- Accelerated implementation and strengthened quality checks by applying AI-assisted development workflows, including Claude Code.

Software Developer Engineer – 1 | Bristol Myers Squibb (BMS) | Feb 2024 – Jun 2024

Client: Enterprise Web Platform

- Integrated Bootstrap through AEM client libraries to standardize responsive UI behavior across devices.
- Designed modular, reusable frontend components with HTML5, CSS3, JavaScript, and AEM practices in collaboration with cross-functional teams.

- Created responsive, accessible interfaces, including keyboard usability and WCAG-oriented practices.

Digital Technology Developer Analyst | Accenture | Feb 2021 – Feb 2024

Client: Southern Glazer's Wine & Spirits (SGWS) | Enterprise Digital Platform

- Engineered reusable AEM UI components for enterprise digital experiences using HTML, CSS, JavaScript, and AEM architecture.
- Reduced manual QA effort by **approximately 40%** by building a NodeJS utility that identified broken image references across **100+ AEM pages** after production deployment.
- Automated structured issue reporting for impacted pages and components, helping content authors and product owners prioritize fixes.
- Implemented automated validation in **Jenkins CI/CD** pipelines to run during production releases.
- Improved page performance through asset optimization and lazy loading techniques.

Education

Bachelor of Technology (B.Tech) – Computer Science | Acharya Nagarjuna University, Andhra Pradesh | 2020

Awards & Recognition

Cognizant Excellence Award | Accenture ICHAMP Award | Accenture ACE Award
